3D Studio Max 3D Studio Max (3Dsmax) is a powerful, feature-rich 3D graphics program for modeling, texturing, rendering, animation, and more. It's commonly used for creating graphic design elements (3D textures), as well as creating 3D models of vehicles, buildings, and other objects in 3D. It has an intuitive user interface that includes a large, high-quality graphical user interface (GUI) and 3D viewer; a simple modeling environment for simple models, such as spheres, rectangles, and cylinders; an assembly tool for creating complex objects such as mechanical assemblies and constructions; a flow-based scripting language; and interactive viewers and inspectors that allow you to interactively view the scene as you design it. Its simple modeling tools work with simple models and it's very powerful for creating complex models. For digital artists to create 3D graphics, you must have a great idea of how the graphic will look in 3D space. That's why you need to have a great understanding of your artistic expression in design, as well as your artistic abilities in modeling and texturing. If you're an artist with limited design skills, check out the tutorials for beginners in the video included in the `DVD: TUTORiALS: 3D Studio Max (3ds Max) Basics` DVD from the DVD series you bought earlier in this chapter.

This tutorial is suitable for novices and experienced users. Procedure 1: Add an Image with Texture After logging into Photoshop, switch to the Insert tab and create a new document. 1.1 Click on New to start a new Photoshop document. Create a new document, a new image, by clicking on New. 1.2 Click on the image icon of the New Document window. Click on the image icon to create a new image. Adjust the size of the new image to 2048 x 2048 pixels. Click OK. In this tutorial, we are going to make a new poster with a background image. 1.3 Click on the Eraser Tool (E). Click on the Eraser Tool. Erase the part of the image that you want to add the background. 1.4 Click on the Eraser Tool. Click on the Eraser Tool, click on the image and use the Eraser Tool to remove the grey part of the image. 1.5 Release the Eraser Tool. Release the Eraser Tool. Repeat Steps 1.4-1.5 until you are satisfied with the result. Now, we are going to make a new poster with a texture. For this, we will use the Photoshop Texture Generator. 1.6 Click on Filter > Noise > Texture Generator 2. Click on Texture Generator to open the Texture Generator dialog box. 2.1 Set Settings using the set of sliders. Adjust the setting of the Texture Generator using the sliders. Adjust the sliders to create the desired final image. 2.2 Click OK. Click OK to close the Texture Generator window. After creating the texture, we can load it into the document. 1.7 Click on the new image icon. Click on the New Image button. 2.2 Click on Open to load the Texture into the new document. Click on Open to load the texture. Close the Texture window. The first texture is ready! Procedure 2: Adjust the Textures Click on Filter > Stylize > Posterize. Click on Stylize > Posterize to stylize the image. Click on Posterize to apply the posterizing effect. Adjust a681f4349e

New U.S. Mine Methodology Gives Casado Tough Green Light Casado Group Inc., an investor-owned mining company based in Houston, Texas, was given permission from the U.S. Environmental Protection Agency (EPA) to increase waste and water volumes at its Lone Star Mine in west Texas by 3.3 million metric tons per year. The EPA issued its decision on June 22, five weeks after Casado was notified of a proposal by the EPA to re-validate the permit allowing the waste increase. On April 14, the EPA issued the decision, which was appealed by Casado.

Q: when i use back button browser only get me to last view controller and not to previous view controller I have this case my problem is the back button browser navigates me to the last view controller in my storyboard but i want to be able to navigate to previous view controller when i press back button instead of the last view controller. This is the code of two view controllers app Delegate and Navigation Controller A: There is no difference between a navigation controller or the parent controller of the navigation controller. You can fix this by adding a default back button in your navigation controller. In the storyboard, select your root view controller Select Editor > Embed In > Navigation Controller Select Editor > Embed In > Navigation Controller Select Editor > Embed In > Navigation Controller you don't have to select multiple navigation controllers. It's ok to have only one navigation controller. This will now have a back button in it. You can click on this back button to go back to the previous view controller.

SUMMARY="Calculate the number of CPU cores available"
