- Ethical Online Communication – This feature is built-in and was specifically designed to help students and faculty understand what academic integrity is and how it can be used. It also includes interactive assignments to reinforce concepts and examples of ethical online behavior. - Digital Citizenship – How are students and faculty supposed to develop a set of digital ethics that they can use to navigate the Internet in a responsible way? How can you be sure that your interaction with the web is creating an environment that is safe and healthy for everyone? This module is designed to provide students with the knowledge and tools to navigate the Internet responsibly. - Internet Safety – Every time you are interacting with the Internet, you are entering an environment that you have to navigate. Your actions online can help you or hurt you. This module provides a brief explanation of what internet safety is and how to keep yourself safe. Students will be able to understand what information they should be collecting, who they should be posting it to, and the consequences of their actions. It will also discuss the importance of privacy and the concept of a “digital footprint.” - Information Literacy – What are students reading online? Where are students reading online? What are students being taught to do when they go online? This module will focus on information literacy. Students will be asked to think about the information they are using and how they are determining what information to use. Students will also be asked to consider how their actions in the online environment can impact them. - Professional Web Portfolio – Students should create a portfolio of their digital literacy skills and knowledge. The most important skills to display online are: - Web writing - Web design - Web development - Blogging - Social media - Email - Other web technologies - Wiki Ethics Beyond High School - Academic Ethics and Internet Use 0:00 The next wave of The Internet in Education series is 'Academic Ethics and Internet Use' - Creating an environment that is safe and healthy for everyone. The next wave of The Internet in Education series is 'Academic Ethics and Internet Use' - Creating an environment that is safe and healthy for everyone. The next wave of The Internet in Education series is 'Academic Ethics and Internet Use' - Creating an environment that is safe and healthy for everyone. The Internet is the one technology that has made it easier for educators to create an engaging and personalized learning environment that allows students to access and use information at any time.
