

Request PDF | Photosensitized cholesterol oxidation in food and biological systems | Lipid. Maria Teresa Rodriguez-Estrada from the University of Bologna. He found that in experiments with lab mice that were exposed to high-cholesterol foods, this resulted in reduced insulin sensitivity and therefore increased glucose and insulin levels. According to Rodriguez-Estrada, the results can be used to develop new approaches to treat metabolic syndrome in humans, which is the cause of heart disease, diabetes and other health problems.
