VeryPDF PDF Stamp SDK

PDF Stamp is a stand-alone application for personalizing PDF documents with an integrated development environment. This software is meant to be

used for creating and applying various stamps to PDF documents. It allows you to stamp images, text, graphics to specific pages, streams, links, contacts, notes, etc. Although the application does not yet cover all of the features available in its adobe based counterpart, it has most of them and works great at the same time. The app comes with intuitive and user friendly graphic and text stamping tools that allow you to create a variety of stamps with just a few clicks. PDF Stamp is easy to use and offers an exceptional user experience and stability. What's New In VeryPDF PDF Stamp SDK?

PDF Stamp is a powerful and easy to use application designed for PDF stamping. It is an easy way to add watermarks, text, graphic and image stamps to PDF files. It enables you to insert stamps with text and image into pages of PDF documents as well as form fields. It can process the PDF documents in batch mode or one by one with all users' setting synchronize. The stamp size can be customized. PDF Stamp supports most of PDF document elements such as name, date, text, header, footer, image and links. It also provides various font, text colors and font sizes. PDF Stamp can stamp from multiple PDF pages simultaneously and keep the stamps in other pages. You can also print all stamps as a watermark in the PDF documents. PC Games software in PlayStation, XBOX and Windows, you will find them all here! Narrow down your search to these categories: Games for WindowsPhone Games for Playstation Portable Games for Wii Games for Xbox 360 Games for Android Games for Iphone Top searches Steam sort by Top rated games Best sellers A-Z Best selling games by genre PAGE 1 of 11/100 SCREENSHOTS VeryPDF PDF Stamp is a software development kit designed to, as its name implies, apply graphics and text as stamps over PDF documents, in a similar fashion to watermarks on pictures or videos. PDF Stamp can add links and notes. These processes can be accomplished within a determined number of pages with precise control over the size and position of the stamped text and images, and they become a permanent part of each PDF document. PDF Stamp has a built-in PDF viewer. You can view the full PDF document through it, navigate your pages with the cursor, and stamp/drag the pages you want. Using a PDF Stamp SDK, you can also add your own watermarks to PDF documents. To use VeryPDF PDF Stamp, first you must download and install it. It can be used on any PC platform (Windows, MAC or Linux). After installation, we will be able to use it from your user interface, and you can also access it through the code. You can stamp PDF documents in batch mode or one by one. When stamping PDF documents in batch mode, you can specify the number of pages to be stamped at once. The PDF stamp
