### What's New in the?

The next generation Content Management System (CMS) that's the result of 2 years of hard work! Key Features: Kentico is a full-featured content management system for building web sites, intranets, on-line stores and Web 2.0 social networks. Kentico empowers marketers and developers in creating websites without limits. It's the ultimate solution for your website, store, community and on-line marketing initiatives. Features : V13.0.140427 V13.0.151028 V13.0.153132 V13.0.150124 A giant of a release, Kentico 13 is a complete rework of Kentico CMS in two years, and is fully supported with new features, enhancements and bug fixes. Kentico 13 architecture rebuilds the core of Kentico CMS from the ground up, implementing a robust architecture that will help you with scalability and stability with no performance bottleneck. We ship this release at the same time of the other, Kentico 8 iterations, 9 and 10, making V13 a more or less stable release. V13.0.150124 More than 10K feature enhancements and bug fixes. RELEASE DATE: January 27th, 2015 V13.0.140427 A year and a half ago we shipped Kentico 8, the first iteration of Kentico in three years. Kentico 8 brought a lot of new features, which got some of our users interested in upgrading their old sites to Kentico. We've been working on V13.0 for the last one and a half years and we're proud of the new release. The most important change is a complete architecture rebuild of the core of Kentico. While Kentico 8 used pre-built templates, V13 uses a complete new architecture based on Web Forms for the content management. The new architecture is built in a micro-service-oriented architecture, which makes the system scalable. It's based on layers, modules and services, and serves as the main foundation for a lot of new features. The new architecture has been implemented to our strategic project plan for two years. As a result, Kentico is becoming more and more modular, which makes it easier to change the code and improve the system, in terms of development and new features. The new architecture makes the system scalable, because Kentico
