AutoCAD Features Key features of AutoCAD software include: Plane selection with vector constraints. Linear and 3D drafting AutoCAD also includes the following features that are unique to AutoCAD 2017 or newer. These features are very useful and can make the software much more productive: Freehand drawing. Edit and run physics. Arc Tool. AutoCAD automation. Split, merge, and offset objects. Vector-based printing. Non-standard objects. Stabilized common commands. Read-only database. User-defined classes. Angle creation and editing. Data management. Inventory and list management. Unit construction. Software releases The company provides three main software versions: AutoCAD, AutoCAD LT (2001 and later), and AutoCAD WS (2011 and later). For a comprehensive review of AutoCAD and AutoCAD LT see my previous article, "What is AutoCAD?" The company also publishes a variety of Training Manuals, which cover almost all aspects of the software. Also available are a series of AutoCAD Workbooks for AutoCAD LT. My intention is to provide a brief overview of the features of the three main AutoCAD releases and to provide links to instructional videos, ebooks, and tutorials from the following links: AutoCAD LT; AutoCAD WS; AutoCAD 2017; What is AutoCAD? AutoCAD was originally created to provide commercial architectural and engineering (A&E) designers with a system to create 2D drawings on desktop computers. For the purposes of this article, however, I'm going to focus on the AutoCAD 2017 release, which is the most recent version. AutoCAD software features include the following: Plane selection with vector constraints. Linear and 3D drafting Drawing, annotation, and annotation tracking AutoCAD feature categories AutoCAD 2017 and 2017.1 provide a number of features that allow users to extend the application and customize it to their specific needs, such as allowing a user to customize the workspace to be much more user-friendly. For example, users can add custom menus to key commands and customize the drawing workspace to suit their

Is it possible to configure like Stackoverflow? I tried set autocomplete="off" for textbox field but then it worked but when i click on drop down, it's close automatically. I don't want it to close automatically. I need a functionality like on stackoverflow, that when i start typing textbox, drop down opens but not closes automatically. Please help me to resolve this issue. A: You can set autocomplete="off" in the textbox onfocus event, then set the open event of the dropdown to open as well as onclick, this will avoid the auto close. A: I think what you're looking for is "onkeyup" and "autocomplete" attributes. So if you look at this fiddle, notice that the default value of the textbox is "Michael". If you type Michael in it and focus out, the dropdown comes up. If you type ou and focus out, the dropdown does not come up. Here is the code (and fiddle): HTML: Javascript: function autocomplete(el, arr) { var i, 5b5f913d15

Open Autocad or Autocad LT and Create a New Drawing or an existing one. In the Object Selection window, choose the Custom shape type and press the 'c' key to copy the custom shape. Choose the File menu option, and choose the Save-As option On the Save As dialog box, choose a path and name for the file and press the Save button. On the opening of the new file (this time Autocad), there is a new custom shape at the bottom of the drawing. How to use the software Click on the Power Tools tab in the Ribbon and then on the Create shape tool. In the Create shape dialog box, choose the Custom shape tab. In the Custom shape dialog box, choose an object with the New custom shape option. Press the c key on your keyboard to copy the object. Press the c key on your keyboard to create the new custom shape. Press the c key again on your keyboard to paste the custom shape.
