How to Use. Once you launch a new instance, you need to finish launching its guest OS's. Once you have done that, you will need to change the KVM options of your hypervisor. Check: A: I had the same problem as you. I tried this solution. Append -avail to the kvm command in order to include qcow2. A: I had a similar problem. You can use a two-step process to increase the commandline length with qemu. First make sure your KVM is set up, and your image is under /images. host\$ kvm -M pc-1.2 -enable-kvm -hda my.qcow2 -initrd vmlinuz.img -append="root=/dev/sda1" Then, setup your machine's boot options. host\$ boot=casper network-file=/images/install.sh boot=local At this point you can install a new disk. Q: How to use a Sqlite database in Android I would like to know how to use a sqlite database in android. I have a menu activity that contains 3 buttons that open different activities. For example: In the first activity, the user enters his/her name and a picture, and by clicking a button, the picture and the name are displayed in a listView in the second activity. In the second activity, I want to use the text and picture entered by the user. This is what I have in my activity_main: package com.example.android.andriodpicture; import android.os.Bundle; import android.app.Activity; import android.database.Cursor; import android.database.sqlite.SQLite
