AutoCAD is the first integrated architectural and engineering program for the Windows platform. Autodesk Maya is a computer graphics program that was introduced in 2005. It is designed to make it easier to create computer animations, short films, and interactive presentations. It is very similar to 3D Max and Digital Cinema Systems. In 2009, Autodesk discontinued Maya, rebranded it as an extension of AutoCAD and re-launched it as AutoCAD 2010. Maya and AutoCAD operate under the same API, and can import and export files in the same format (all other Autodesk programs also use the same format). Maya was originally based on the Max and XSI rendering engines, which was licensed to other rendering companies. Autodesk Inventor is a 3D design software. Inventor is used for mechanical design, architecture, interior design, and engineering in a wide variety of industries, from consumer products to aircraft and appliances. Autodesk Revit was a complete house design package, released on January 24, 2008. This was Autodesk's first major redesign since being purchased by Autodesk and the first major release since 2007. This software is based on the Microsoft Windows API. Revit Architecture Edition is a professional edition of Autodesk Revit Architecture for home and corporate design.
