What's new:

Magic. Epic Apps for Riding Horses. This is a bizarre hard drive cram job. This is one of the more interesting SSD articles we've read in the last 12 months. Please enjoy!

Introduction Our sister site SSD Review is one of the best coverage of SSDs on the web. However, their very limited coverage of high-performance SSDs means that they can't cover every product on the market. If you need a review for an iRacing, Game of Thrones, Battlefield, Skyrim or other high-performance SSD then this review will probably be useful for you. The website owner (Sean is cofounder and editor in chief) has arranged for an exclusive review tour during 2013 in his home town of Los Angeles. The tour will be held in March and is a one off (presumably they will not fly out another reviewer). That means we need to get this content into iRacing and Game of Thrones as soon as possible. The idea behind the article is to simplify the tour and get the content out quickly. We reviewed the following SSDs for our site: When all is said and done, the conclusion

we have is that... None of the SSDs are recommended for M4. **ASUS XG SX730C** **Asus XG SX730C Performance** **Asus has modified its popular XG NX800 series SSD to include 7mm NiO DWN-9 solid state drivers.** **Thanks to continuous 0.25 micron fin cuts, the 7mm SATA III SSD boasts the shortest stroke length of any SATA III SSD and delivers much faster read speeds than its 10mm predecessors.** **Other major advances include an upgraded SATA interface, which delivers 300MB/sec of sequential read and write speeds.** **DRAM-less flash memory means less chance of performance degradation in the event of component failure and reduces the need for flash firmware.** **7mm DWN-9 internal design.** **The first WD Black (9k) 8TB SSD.** **The WD Black (9k) drives have been widely adopted into enterprise storage environments and provide higher performance, less power consumption, and greater data retention than their predecessors.** **Featuring WD Blue (8TB) and WD Black (16TB and 32TB) drives, the WD Black (9k) range features WD's lowest power consumption because the drives do not require a separate DRAM cache component or additional management power.** **Compared with 10k drives in the same power class, the WD**
