You've probably heard about the gender pay gap. But how well do you know the other numbers on the gender pay spectrum? A new report by the American Association of University Women (AAUW) aims to give you the facts you need to understand the bigger picture. While it's easy to tell you which industries have the biggest pay gap and which ones have a high percentage of women in leadership positions, the AAUW report provides more in-depth analysis of the issue. It also analyzes state-by-state data on wage and employment trends for women by education, work, occupation, industry and career track. What are the real gender pay gap figures? According to the AAUW, the gender wage gap in the United States is 15 percent: Men's earnings are, on average, 15 percent higher than women's. "While wage gaps are one measure of gender pay inequality, the gender wage gap is not the only measure," said Nannette Heger, president of the AAUW. "There is also a gender pay gap in each occupation, with men and women being paid differently for the same job." The biggest gender pay gap is in positions that pay the least. "In jobs that pay the least, the pay gap is largest," Heger said. Women in the low-wage work force are paid on average about \$10,000 less than men who do the same jobs, according to the AAUW. The pay gap is also huge when women look at what they've earned over a lifetime, compared to men. According to the AAUW, women have worked 10 years longer than men. The differences in pay are amplified over time. What do the numbers say? The report shows how women make up the majority of entry-level jobs in education and health services, but the number decreases as the occupation moves up the ladder. "The AAUW report is a
