As a name says, the game is about two types of images. One is a small image with a big image and another one is a big image with a small image. The game is about to create a circle by finding in pairs a inner image and an outer image, which make the big image turn the small image. In a relaxed game the circle isnt need to be the same image as the pattern is not need to be a circle at all. The Big image and Small image are the only images which can be found within the game. You can also end the game with the wrong solution, which means the game is about to be a easy game. The colour of the images has no use on the game at all, but there can be a little easter eggs in the game which have a kind of easter eggs with a story about the hidden images, but they are not needed to be found on the game. Features: - Game for windowed mode! - Intuitive game with nice animations. - Modern graphics (pixel-perfect) - Colorfull graphics - Smooth game - Soft music - Easy game mode (unlimited) - Timekillers mode Controls: You can use your keyboard and mouse. Tablet-support is planned! Short info about the control: The arrow keys are the required for your mouse. Spacebar for an option to play game screen and to open the settings menu. Option to switch sound on/off Option to start game, which starts with a 5 minutes countdown to your game start. Option to fast game play (the game play is max. 3x3) Option to play a little relax game mode Option to play the game in the settings menu to get access to extras and to play the game on fullscreen Option to switch sound on/off Comment Hi mate, I'm so sorry for that but the game isn't available for Mac OSX. Sadly because the game engine is written in java, it's technically not possible to port the game to mac yet. But if you guys really want a mac version you can buy the game in the appstore. It's not much money and i believe that you deserve a mac version as well. Comment I have created a new forum post, just because the old one where not created properly. I don't want to delete the thread, so what i did was create a new one.

Hinterhalt 3 is a fast, fun and action packed toy soldiers game for browser. Hinterhalt 3 is not only a fast-paced shooter where you can carry on a whole battlefield, but also a special arena where you can show of your skills on a completely automatic and ambient environment. You can play with your friends and enemies in the 2 player coop or with a single player game for unlimited goals. Featured Game modes: Skirmish: Eliminate all opponents and protect your team mates. The first team reaching a specific number of eliminations wins the match, the other one will go home as the big looser. Ambush: A capture the flag based game mode with slight variations where the attacking team must capture all the flags within a given life-budget. The defending team on the other hand has an infinite number of spawn, however, must defend the flags by all cost. Luckily, it disposes of heavy weapons such as mortars, artillery and static machine guns and decimate and blow away the enemy. Zombies: Rules are simple. You spawn, they spawn, you run out of ammo, you need to find ammo, eventually you lose....or...who knows! Obviously, Zombies get stronger throughout the game, making it more and more unlikely to survive and an ever-increasing challenge. Commander: In this auto battle based mini-game you define the actual spawn areas of your soldiers and strategically position heavy weapons. Maps are randomly generated and thus require new strategies and positioning per match and the first team to reach a specific number of kills wins.Art Style: Carefully designed art style, a mix between low poly and cartoon, and selectively chosen sounds, outlandish animations, GUI and visual effects provide a great addition to the whole game experience.Game Modes: Skirmish: Eliminate all opponents and protect your team mates. Cells from the mouse skeletal muscle line C2C12 express and respond to glucocorticoids (GCs) via the glucocorticoid receptor (GR). In this paper, we present evidence that differentiated C2C12 myotubes are sensitive to low concentrations of GCs, and that they increase the rate of myogenesis. This was demonstrated by preculturing C2C

What's new:

light Heroes of the Darklight By John Carrey The first time I saw the old center weathered red roofed Pioneer War Memorial building that stood half-burned in rubble on the outskirts of the rapidly growing town of Hiwassee, I knew this was the house that was haunted, no question about it, and I also knew there was nothing more sinister, perhaps vicious, than to stay in the rooms it contained. Still, I had begun to hear the sound of the children's voices and watched carefully, a boy alone in the woods, to see whether the older youths who might also be in the woods would appear. They never did. I do not remember the words I used, and perhaps if I had said something to the effect of I wouldn't stay and haunt the place, it might have been a whole lot better for me. I don't know. On my own my curiosity was immense, and the thing I had most wished to know was, just how was it that this place was still occupied, and who was actually living there? Like all boys, I loved to play ghost stories, and I suppose in a lot of ways this is the story of the life I myself wished to have. I wanted to be able to confront ghosts, and to face things that were not of this world. On account of the stories I had heard, I originally decided to remain completely quiet in the house and listen for any sounds that may come from them, or any sounds that may come from within. I was not very good at waiting. It didn't take long for something to happen. I heard the sound of glass shattering. It came from the back window, and I soon found I had to be there to see what I was hearing. Just as I was about to step inside, on the rooftop of the house, a man suddenly appeared, carrying a bomb-shell of broken glass. My heart sank when I realized that I was the cause of this disturbance. I was not even able to scream in surprise, let alone in fear, and it was going to be impossible not to see the man as he jumped down from the doorway and approached me, the glass from the window sticking in his back. He didn't have a chance to see me, he had barely made a mistake by doing this, for I was only a boy, small and weak, yet, as I sat in the grass, he leaned over me

Grab the controller and take control of the Rock Band 4 guitar in the most flexible way! The Rock Band 4 guitar controller is the only Rock Band guitar that can be played with a button-based guitar-style controller layout. Each of the buttons control the basic playing, strumming, and vibrato techniques

of Rock Band guitar. However, two buttons provide additional flexibility. The first button at the base of the strings can act as a strum or vibrato bar, while the second button to the right of the strum/vibrato buttons allows for mix-and-match strums or vibrato-and-strums with the special Rock Band note. A special button, located on the neck, toggles between playing using the button-based layout and playing using a real, fully independent guitar. The Rock Band 4 guitar controller is a must-have for anyone who is looking for a rock-solid guitar controller without making compromises in the design. By using both the button-based and real guitar layouts, the Rock Band 4 guitar can be used with a traditional guitar setup with a MIDI guitar and microphone, or the Rock Band 4 guitar controller can be used with a normal guitar and an optional wireless microphone. The Rock Band 4 guitar controller is also compatible with standard Rock Band instrument controllers. Features of the Rock Band 4 guitar: With the Rock Band 4 guitar you can play the music in Rock Band in the most flexible way – play as a standard guitar, play a virtual guitar, play with an actual guitar, or play a mix-and-match arrangement of the two. Traditional guitar setup with MIDI guitar and microphone: Using the back of the neck of the guitar controller, you can easily switch between rock-solid button-based control and free-flying guitar as you plug in your guitar and microphone. Virtual guitar and microphone setup: This comes with the keyboard controller with customized chord charts and, optionally, a microphone that allows you to play the instrument with your natural voice. Dual guitar and microphone setup: This gives you both the traditional button-based guitar control and the virtual feel of a real guitar, while optionally using a microphone and controller. Advanced Rock Band setup with the use of a stand: The Rock Band 4 guitar controller fits perfectly on the Rock Band 4 stand and gives you the same feel of a normal guitar without the hassle of getting a stand for your guitar. Included in Box: Rock Band 4
