As an ever-evolving system of country and empire states, the MMP offers players the chance to assume the role of a future president and use their charisma and judgement to manage and influence a number of factions. The game features 25 Presidents, each with their own unique characteristics, personalities and personal goals. The game offers players the chance to create their own factions by utilizing all their political, diplomatic and martial powers. An original battle has been recreated, using real military, history and political books and documents as the source material. Here you take the role of the United States of America, and fight against the Confederate states of the south to liberate the western states from the slave trade. As the American Civil War was fought from 1861-1865, you will be working through the battle of Bull Run, a large scale, and enormously historical battle between two of the earliest major warring factions in the United States of America. Bull Run was the largest battle fought on American soil before the Battle of Gettysburg, and was watched by the world as Union and Confederate soldiers clashed in the final scene of their war in the summer of 1861. Here you will take control of the Union's army, made up of Northern Confederates, and clash with the Confederate army of Virginia and Maryland. If you are successful in pushing the Confederate forces back over the Potomac, you will win the game, as the region will be able to return to the American Confederation. Under the leadership of President Abraham Lincoln, the Union army has begun to take back the western territories and the president wishes to remove the last remnants of the slavery in America. If you are successful, you will have the chance to unite the western territories and free all the slaves from the Confederates.

01.01.2010 THE IRISH GAME. The Irish Game March 25, 2010 by Irish Video Game Every game we record starts off with a certain degree of nervousness. That nervousness is accompanying the original idea, and then the nervousness decreases (or is alleviated) as the recording process begins. Also, one can tell when a game is really on the way when it starts to feel like we're doing something we're really not supposed to be doing. The latter is becoming increasingly true of our own games, and the community seems to be understanding this. The video store and game review sites are saying things like, "This game is a great idea and it shows promise, but there
