Black Indian Set to Turn Down \$100 Million Deal When movie directors see money, they like to make films. But a subset of movie directors -- including some of the biggest directors in Hollywood -- make a special fetish of money, and just when you think it can't get any weirder, they find a way. Hilarity does not fail to ensue. According to the New York Post, this summer's big-budget movie will be "The Promise," from director Ridley Scott. The movie, starring Christian Bale and Charlize Theron, is about "two people...

coming together as one to liberate a people in 1845." Christian Bale was once reportedly involved with his character's wife, though the director has denied that to the Post. The film is currently in production and will debut in the U.S. in March 2007. Movie mogul-cum-founder of World Wrestling Entertainment (WWE) Vince McMahon was inspired to create his own wrestling promotion after seeing *The Magnificent Seven*, a 1955 film in which Burt Lancaster plays an old soldier who takes in a group of troubled and war-weary, former outlaws. He made the group "The Magnificent Seven," hired the first seven men, and in 1967 created the World Wrestling Federation (WWF), Inc., as the wrestling league for the new venture, hoping to find the same success that other minor leagues had found with the mafia, biker gangs, and other American popular culture icons. The company went public in 1971 and prospered, causing McMahon to add name partners to his company and launch other ventures. The company's gross revenues grew from \$700,000 to \$500 million in less than a decade, and the WWE became an international force, with outlets in the United Kingdom, Germany, France, Sweden, and Japan. On the one hand, this seems like a story that could be on the cover of a philosophy textbook. On the other hand, there's a wealth of something else here. The company quickly became a kind of archetype for anti-authoritarianism in American popular culture. During the 1970s, when popular pro wrestling embraced such libertarian ideals as individualism, free choice, and freedom from authority, the WWF was the wrestler's default for that subculture. They had a greater impact in the culture than any other professional wrestler ever has. The other point is that the WWE made a business and a career out of comics, movies, and TV -- not only as business
