## What's new in Elden Ring:

**Also, it will be a game where the progress and progression are not separated unlike most other RPGs.**

The player's level, items, and equipment and items can be fully utilized even online. In addition, the world is one, so once a player leaves the region, he or she will not be able to return until their character has regrouped.

Moreover, this game is a game where the character development system is also separated from the game itself so that it is possible to customize your own character by choosing the degree of freedom of character development, by selecting the character's gender, the body shape, and the tastes of the character. Furthermore, by selecting the goals that the player wants to achieve, it will be possible to grow the character while the game is played. In other words, you become the hero of your game and your own story.

Further information on Curse of the Moon as announced at the Dengeki PlayStation *PlayStation Show 2014* and the TGS14 show will be provided in the near future.

**Development History**

The development of *Curse of the Moon* started around the time when a game called "Re:living R by Sixth sense" had been ready and developed. In addition, the key creator of the main series of *Curse of the Moon* will be involved in *Senran Kagura Burst Re:Newal*.

A concept where one can enjoy an RPG-like online experience with other players while connecting their

own and others' characters, with a multitude of possibilities is still a concept that has not been realized in any game to date, and both creators and readers have been waiting for it. Research is currently in progress. The development team is confident that they can create a game in which the other is present and shines as the main protagonist. We hope you have fun with it.

Thank you for playing *Curse of the Moon* and looking forward to your feedback.
