AutoCAD History The first AutoCAD was developed by Marshall Newell, a graphic artist, in 1980. When he began working on the first AutoCAD, Newell used BASIC on a 386 running CP/M on an HP 2316C monitor. The first AutoCAD ran on a 20MB CP/M drive. AutoCAD was released on December 21, 1982, when Newell ran off a tape of the beta version. The first price was \$495. It ran on a Tektronix 4010A graphics terminal. Newell worked on it until 1982, when he went on to start another company. AutoCAD originally shipped on a ROM-based system that could not be updated, which meant that it was released as a perpetual license. The first version of AutoCAD contained a toolbox with enough tools to let the user design an aluminum awning or a house. The program was organized into three layers: the user

interface, the editing window, and the drawing window. It was expensive because of the RAM that was required, but it was also expensive because it contained all the tools. In the early 1980s, the tools that were available included: the Tape Marquee tool, the Tape Eraser tool, the Tape Align tool, the Tape Line tool, the Tape Follow tool, the Tape Decal tool, the Tape Rectangle tool, the Tape Linear tool, the Tape Arc tool, the Tape Ellipse tool, the Tape Raster tool, the Tape Rectangle tool, the Tape Font tool, the Tape Reverse tool, the Tape Scribe tool, the Tape Arc tool, the Tape Circle tool, the Tape Extend tool, the Tape Align tool, the Tape Poly
