A: The reason for the error is that the x64 version of the program uses the WinToUSB.exe API for 64-bit executables and not the one which is there in Windows only. You can try to: Open the WinToUSB.exe as an Administrator Run the program in the Compatibility tab (3rd button, 3rd tab) and select "Run this program in a different compatibility mode" in the drop down list if (readObject.isSerializable()) { ObjectOutputStream(petOu

This channel is also known as "Win To Usb" or "Win To Usb". WinToUSB: Wintous at full functionality even if a physical drive has no free space on it, or the full removable media (CD/DVD) cannot be inserted to the PC. WinToUSB supports dual-boot, protects the PC against possible damage caused by installing an OS or a faulty installation routine, and includes comprehensive error reports. The tool is designed to enable the user to install Windows, but not to fix any issues. If WinToUSB encounters problems while installing an OS, it will work (with luck) to have the OS working, but the user is still required to repair possible hardware issues. The program also allows the user to edit partitions, format a new partitions, formated drive), resize partitions, and combine two or more partitions. The software also supports resizing NTFS-formatted drives, and creating, deleting and resizing Swap partitions. The program has been tested with Windows 7 Starter, Home Premium, Ultimate, Pro, and Enterprise. Features Bootable OS Runs from any installed removable media (USB, CD, DVD) Dual-boot, enables the user to boot a Windows installation on removable media with NTFS formatted drive, and boot an OS installed on a hard disk. This feature enables the user to keep his old OS working, and also to install another OS, such as Linux, if the removable media is not large enough for a new Windows system. It is compatible with both 32-bit and 64-bit Windows operating systems. It does not automatically run any system repair tools on the Windows installation, but offers a repair wizard to boot the system with a repair CD/DVD or USB drive to fix the issue. It can be used to reinstall Windows, fix registry issues, or recover an installation that has become corrupt or does not
