2.83 Free Download. The latest Auto Poweron & Shutdown version is 2.83. The program has been tested by our team to be 100% .Protection of adrenal cortical function against corticotrophin-releasing hormone-induced adrenocorticotrophic response by metyrapone in rats. To determine the role of corticosterone (B) in the CRH-induced ACTH release, the effect of metyrapone (ME), which blocks the metabolism of B, was evaluated. A single i.v. injection of CRH (250 micrograms/100 g body wt) produced significant increase in plasma ACTH concentrations which were attenuated by ME, but not by B, in sodium-replete (Na+) and sodium-deplete (Na-) rats. Plasma ACTH concentrations were also raised by an i.v. injection of ME, but not of B, in Na+ rats, and by an i.p. injection of ME, but not of B, in Na- rats.

The B replacement therapy (500 micrograms/100 g body wt, twice i.v. at 2.5 hr intervals) inhibited the increase in

---

plasma ACTH levels induced by ME in Na-rats. The plasma B and urinary B concentrations were measured as markers of B metabolism. The plasma B concentration in Na+ rats was not affected by CRH or ME, but urinary B excretion was significantly increased by CRH. However, urinary B excretion was not increased
