Lively and animated screensaver of the planet Earth and the Sputnik satellite viewed from among the stars.... 3D SputnikGlow is a screensaver/desktop wallpaper designed as a tribute to the most famous USSR satellite, Sputnik-1, which revolutionized human perception of Earth and space. The screensaver displays images of well-known Soviet technical products, as well as some of their best-known and outstanding representatives. The wallpaper contains many elements obtained from the available images of the most famous Soviet satellites. It adds a sparkle and fullness to your desktop.

nfsSputnikGlow Description: Lively and animated screensaver/desktop wallpaper designed as a tribute to the... Astragalus Screensaver - Astragalus is an animated screensaver dedicated to space, which features the Space Station, International Space Station, the Moon and the Sun in space. Astragalus also displays time, and with the time, time stations, which are divided by seconds, minutes, hours, days, weeks and years. Astragalus screensaver features 46 diverse astronomical objects: the Moon, the Sun, planets (Mercury, Venus, Mars, Jupiter, Saturn, Uranus, Neptune), space stations, comets, asteroids, galaxies, meteors, a star cluster, the Milky Way Galaxy, the Solar System, and the Universe. The screensaver is intended for entertainment and relaxation. Astragalus screensaver is released under the terms of the GNU Free... Sunspot is a software for the display of the sunspot activity. It is being developed in the Department of Physics of the Moscow State University. The program is available for Linux, and for Windows, but it has not been very successful as a portable program, due to the low resolution of the embedded images. The aim of the program is to provide the user with a set of self-produced beautiful images in an unobtrusive and free software. The application is very useful when observing the movements of the Sun. It could be also useful when observing the Sun with a telescope and a small camera. Sunspot is a long-term project with the aim of making it available for... Nova is a screensaver designed as a tribute to the Nova, which was the first artificial satellite launched by the USSR. Nova features 50 pictures of the Space Station and its most popular elements, as well as the spacecraft Spartacus.
